Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 10/590,643	Applicant(s) MUELLER ET AL.	
	Examiner /Yonel Beaulieu/	Art Unit 3661	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8, 9, 14, and 15 are rejected under 35 U.S.C. 102(b) as being anticipated by USP 5084822 to “Hayami”.

Regarding claims 8, 9, 14, and 15, Hayami teaches storing map data in a navigation system (figs. 6 – 8a, 10 – 12a at least) comprising a control system (8) for calculating a driving route between a start point and a destination, using a first level map data stored on mass storage medium (7A; summary; col. 5, lines 7 – 66; col. 6, lines 55 - 63 at least); selecting (based on a criterion using item 8C) a second level map data that include only road path segments within a defined corridor around the driving route (R_{13} to R_{15}) and storing the data in a memory (7B) of the navigation system (note col. 8, lines 16 – 40; col. 9, lines 34 - 42 at least). Hayami further teaches the above limitations including all first level map data corresponding to at least one of a first defined region around the start point and a second defined region around the destination are automatically included as a part of the second level map data (as supported by figs. 5a, 5b, 9a, and 9b at least).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 10 – 13 and 16 – 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hayami ('822) in view of USP 6917878 B2 to Pechatnikov et al. ("Pechatnikov).

Regarding the above claims, Hayami teaches all of the limitations except for the utilization probability.

However, Pechatnikov teaches, in the same field of endeavor of navigational system, utilizing probability of road segments ([item 850 in fig. 8B]; note col. 16, lines 15 – 69 at least).

It would have been obvious to one of ordinary skill in the art at the time of the invention to have modified Hayami's teaching by utilizing probability as evidenced by Pechatnikov in order to enhance determining routing instructions.
